CORE COMPETENCIES

- **Lighting Design:** Our lighting distribution and design team offers photometric layouts that adhere to any application or budget with options focusing on energy efficiency, affordability, durability, color rendering index, smart control capability and RGB color changing accent lighting.
- **Architecture & Engineering:** Our experienced engineering team has years of knowledge in designing systems to accommodate all spaces. We provide our clients with a set of sealed drawings which include mechanical, electrical and plumbing plans.
- **Electrical Contracting:** Our team of highly qualified electricians specialize in professional installation for projects of any scale. Our electricians have completed many installations including commercial, stadiums, hospitals, EV charging stations, manufacturing facilities and residential.
- **Construction Management:** Our project management team guides each client through every phase of the construction process, from preliminary budgeting and scheduling to final building inspections.

DIFFERENTIATORS

- We offer each of our competencies as an independent service, while offering the option to combine our capabilities, resulting in improved workflow and communication by keeping multiple facets of the construction process in house.
- We have established relationships and distribution with lighting and EV charging station manufacturers as well as an experienced electrical contracting division to ensure competitive pricing on lighting installation projects.

PAST PERFORMANCE

- TACOM—Detroit Arsenal, MI Subcontractor for RB Construction Fluorescent Light Fixture Replace with LED Kits 2023—2024
